

**Name : Khaled Ibrahim Mohamed Awad**

**Section : 3**

-----  
**Q1: Write notes about the types of ROM ?**

**ROM– PROM – EPROM – EEPROM**  
-----

**Q2: The main difference between RAM and ROM is ....**

- Read / Write
- Read Only
- No Read / Write
- **None of the above.**

**Q3: The size of Memory is depending on**

- **Address lines**
- Data lines
- OR gates
- Address lines and Data lines

**Q4: True or False**

1. **1 bit = 8 bytes ( F )**
2. **16-Byte word = 4 bytes ( F )**
3. **32-bit word = 4 bytes ( T )**
4. **RAM is able to provide READ / WRITE ( T ).**
5. **ROM is programmed and the data is stored based on Hexadecimal system ( F ).**
6.  **$G(\text{giga})=2^{20}$  , it means the number of address lines is 20 ( F ).**
7.  **$64K = 2^{16}$  , the address lines is 64. ( T )**
